

Kindergarten Oral Health Assessment (KOHA)

Help support your child's health and educational future!

IMPORTANCE OF KOHA

The Kindergarten Oral Health Assessment helps schools identify children suffering from untreated dental problems which can lead to absences from school. Children in pain due to oral health issues can find it difficult to eat, concentrate and learn.

Before your student enters Kindergarten, you will receive a KOHA form included within the enrollment packet. Completing this form can improve dental resources for your community and help connect your child to preventive dental care.

Taking this important step today can help support your child's health and educational future!

WHERE TO GET KOHA FORM COMPLETED

California requires assessments must be completed by licensed dental professionals.

- For copies of KOHA form in multiple languages, visit the California Dept. of Education website.
- To complete the form, connect with your current dental provider.

IF YOU HAVE MEDI-CAL
