

March 9, 2021

Dear Food Facility Operators:

As essential businesses, your hard work and dedication to providing food to the local community during this unprecedented global pandemic is admirable and very much appreciated. You have done a great job at following local and state health order guidance as well as implementing social distancing, masking, and other protocols to keep your employees and customers safe.

Contra Costa Health Services (CCHS) is strongly encouraging all essential workers at food facilities to [Get Vaccinated](#) at no cost to you (see attached flyer for information). There are many vaccination sites available throughout the county. Many local healthcare systems, pharmacies, and other providers are currently providing vaccines to all food and agricultural workers. Appointments for these various vaccination sites can be made online by visiting our website at coronavirus.cchealth.org/get-vaccinated and selecting the link for ***Making an Appointment***.

Vaccine appointments may also be made via telephone by calling:

- [MyTurn \(State of California\)](#) | 1-833-422-4255
- [Contra Costa Health Services](#) | 1-833-829-2626

Informative vaccination flyers in both English and Español can be found [here](#).

Keep in mind that due to vaccine supply constraints, it may take time for a vaccination appointment to become available, but please don't let this discourage you from looking into obtaining an appointment today. Help us increase the number of vaccinated individuals in the county by encouraging all of your staff to try booking a vaccine appointment as soon as possible and [Get Vaccinated](#).

Stay safe.

Sincerely,

Contra Costa Environmental Health
